

Job Offer Adquantic:

Researcher in computer science

Our company: Adquantic is a young start-up based in Paris. We optimize the investment in internet advertisement campaigns on Google, Bing or Facebook through proprietary tools. Our researchers all come from an academic background and this allows us to implement the most advanced technologies in our optimization tools.

We are looking now for a passionate researcher expert in semantic technologies / natural language processing to expand our research capability.

Role: Researcher, full time, open ended position.

Team: You will join a young and dynamic team, coming out of the best schools and companies (École Normale Supérieure, INSEAD, McKinsey).

Ideal background: You hold a PhD in computer science or in a related field and you have a very good knowledge of at least one these areas: semantic web, natural language processing, computational semantics. Good programming skills are required.

State of mind: You have an entrepreneurial, creative mind and you are excited at the idea of joining a young and promising start-up in which you can make a real difference.

Location: Our offices are located in central Paris, five minutes walk from Bastille metro station.

Contact: if you are interested, you can send a resume and a cover letter at the address jobs@adquantic.com.
